Ref: Low Power FM (LTFM) Broadcast Service  
MB Docket No.04-233

To Whom It May Concern:

I am writing this comment concerning the above Broadcast Service and the effects that I feel it will have on my radio station. I feel that by expanding this service will allow the new LPFM stations to take priority over current FM translator services in my area and in particular my radio station K-Love heard on 91.1 FM.

K-Love radio serves an important part of my life as well as my families and several of my friends. This radio station not only plays great Christian music but music that is safe and positive for everyone to listen to. We do not have to worry about what kind of music our children are listening to because we know that K-Love will always play good music for everyone.

I feel that the negative effect on our local community would be great if K-Love were to be displaced by an LPFM broadcaster providing other programming. We would not have the control over the types of music played by this station as we do with K-Love radio. Our children would be subjected to music that in our opinion is not safe for anyone to listen to not alone our children or our loved ones.

K-Love plays a great service in our area by playing safe and positive music that is good for all ears to listen to and not to some of the vulgar music played today on other stations.

Please feel free to contact me for any further comments or assistance that I may be for you.

Sincerely,

*George A. Nightingale cgs*
